Captions are now available so you can read what you can’t hear and enjoy the latest movies with your family and friends. Captions are delivered via a personal device, with a high contrast display and privacy screen, so only you can see the captions. This means that you can sit in any assigned seat in the cinema. Please see staff at the cinema to collect the equipment and please note the equipment is subject to availability and you may be asked to leave a form of ID to ensure the safe return of the equipment.

Do you have difficulty hearing at the movies?

For our hearing impaired guests we offer both assistive listening devices which clarify and intensify the movie’s audio and closed captioning devices which deliver a written description of the film’s audio.

See the action in sound! AD

For our visually impaired guests, now you can listen to audio described movies so you can hear things you might have difficulty seeing with a spoken commentary and enjoy all the parts of a movie, including visual jokes, visual scenes, settings and body language. The audio description is delivered through a personal headset or neck loop. This means that you can sit in any assigned seat in the cinema. Please see staff at the cinema to collect the equipment and please note the equipment is subject to availability and you may be asked to leave a form of ID to ensure the safe return of the equipment.

For further information on accessible cinema please visit the Media Access Australia website at www.mediaaccess.org.au or send them an email at info@mediaaccess.org.au or call (02) 9212 6242.

Check session details or ask a team member for enabled sessions.
